

Success Story SAP - B-COMM for R/3 ERP

B&Q Plc, Eastleigh Hampshire, Great Britain

A perfect partnership at B&Q provides a successful integration of Time Recording into SAP

Leading DIY and garden centre retailer B&Q, now in its 33rd year of trading, with a turnover of £3.2 billion, 33,000 employees and over 300 stores in the UK alone, chose Kaba Benzing for the implementation and installation of a time recording solution throughout most of its 300+ stores.

B&Q were looking for a heavy duty time recording system that interfaced seamlessly into SAP HR, and which could help the company develop a consistent set of efficient processes to record the attendance of staff in the stores. The system is also helping them develop the rules which govern how the time-keeping records are used to pay staff, and support the objectives of the Labour Scheduling project. The data is being collected centrally and passed into SAP time evaluation module, where the store managers can amend and confirm the time sheets prior to them being passed into SAP payroll.

Selecting B-COMM for R/3 ERP to complement SAP was easy:

- B-COMM connected with B&Q's SAP HR module without additional customisation.
- B-COMM enables up to 40,000 staff to book quickly onto the T&A module of SAP, even at peak times.
- Kaba Benzing's expertise in the SAP marketplace gained from over 700 installed customers.
- Kaba Benzing's investment security for long-term partnership and support.

"The B-COMM R/3 ERP for SAP system was selected for a number of reasons."

"Its immediate SAP integration was a far more cost effective option than installing a third party supplier and interfacing that into SAP. The almost 'plug and play' technology makes the system easy to configure. Also, as an SAP Certified Software Partner, Kaba Benzing could ensure that future developments would keep the system up to date."

"In addition, we were looking for a complete support service which Kaba Benzing was able to provide, and all the cost elements - the clock, software and maintenance - were very competitive."

"The almost 'plug and play' technology makes the system easy to configure."

"Also, as an SAP Certified Software Partner, Kaba Benzing could ensure that future developments would keep the system up to date."

"Throughout the installation, the Kaba Benzing team has been very professional, patient and helpful. Their commitment to the project has been very good."
