Success Story

InFoScore, Baden-Baden

«The retrofitting from the old to the new system was relatively simple and at a reasonable price.»

«Kaba Benzing provided the right technology! The system runs without any maintenance effort, you don't even recognize it.»

Bernd Kraßnitzer,
Project Manager

PARTNER

A safe start with the right partner

«More success for you and your business» that's InFoScore's motto. InFoScore means information management, receivable management and scoring systems. E-commerce and factoring complement these three core fields to make up the group's five sectors of business. InFoScore's made-to-measure information and financial services overlap in all phases of a customer relationship. The group employs around 1,000 people in 22 individual, specialized companies in Germany, France, Ireland, Austria, and Switzerland.

InFoScore was Kaba Benzing's 500. SAP customer. SAP HR was implemented in Baden-Baden on May 1, 2000 - at the same time than Kaba Benzing's positive Time Recording system. Previous to that, InFoScore has already gained experience with another Time & Attendance system. «We were already using the Kaba Benzing system before we moved to Baden-Baden», says Bernd Kraßnitzer.

«After our move the devices could be re-equipped with Legic readers in order to combine the demands in locking systems with state-of-the-art time recording and access control. We opted for the Kaba key with integrated chip because we didn't like the idea of having two things at the key ring.»

The retrofitting from the old to the new system was relatively simple and at a reasonable price. The existing terminals could still be used and only had to be retrofitted to the Legic system. The integration into SAP is provided by the B-COMM for R/3 ERP interface. Bernd Kraßnitzer draws the balance: «The system runs without any maintenance effort, you don't even recognize it.»
