Success Story

Balluff GmbH, Neuhausen a.d.F.

«We have made the right decision to decide in favor of the market leader.»

«The error-proneness of the old system was very high. This has substantially improved with the Kaba Benzing terminals. Our capital investment has quickly amortized.»

Bernhard Herzog
System Manager

BALLUFF

Sensors Worldwide

Stable system from the market leader

With more than 40 years experience in the sensor technology field, Balluff is today one of the most capable manufacturers of electronic and electro-mechanical sensors, rotary and linear transducers, and identification systems. Innovative technology, state-of-the-art electronics, and application-specific customer solutions are the hallmarks of Balluff's entire product range. Balluff started using the SAP R/3 ERP system in 1993, first implementing the FI and CO modules. Next, an HR and Time Management solution for 650 employees was introduced. «There were three suppliers which we examined closely. We decided in favor of Kaba Benzing because our HR advisor knew of positive experiences from other customers and because Kaba Benzing is the biggest supplier in this field», explains Bernhard Herzog, System Manager at Balluff.

«We have made the right decision in favor of the market leader.»

Balluff uses Kaba Benzing's B-COMM for R/3 ERP software with time recording and access control modules. The Kaba Benzing terminals at Balluff run stable and error-free. The implementation of Kaba Benzing's access control solution at Balluff on July 1, 2002 went off smoothly.

«The number of erroneous punches was very high with our 'old software'.»

By using chips and the LEGIC application, erroneous bookings could practically be eliminated. Maintenance work at the terminal is no longer necessary at Balluff. Our capital investment has quickly amortized,» comments Bernhard Herzog.
