Success Story

«Kaba Benzing's B-COMM application made the transition to SAP's time management module easier. The devices work perfectly with our environment. B-COMM offers great functionality and the integration went really well - we were live in just 60 days from our first meeting.»

Wayne Pressley
SAP / HRIS Project Manager

BMW Manufacturing Corp., Spartanburg - USA

B-COMM for R/3 ERP and SAP - a perfect fit

BMW North-America was founded in 1975 as import company for the US-market. When BMW Manufacturing Corp. of Spartanburg, South Carolina, switched their time management processing system to SAP's HR module, they needed a state-of-the-art time collection solution that would interface perfectly with SAP. BMW's project team also recognized that any successful complementary solution would have to be a certified SAP partner with a quality product robust enough to handle time data collection for a diverse workforce of more than 4,000 associates. That's when they turned to Kaba Benzing America. Selecting B-COMM to complement SAP was easy:

- B-COMM interface connected precisely with BMW's SAP module without any additional customization
- B-COMM functionality exceeded BMW's expectations, allowing for better management for complex pay rules
- B-COMM flexibility enables BMW to link employee badge numbers to the SAP system
- B-COMM quality ensured a smooth integration with almost no downtime

Kaba Benzing America's B-COMM software was the perfect complement to SAP. B-COMM, a next generation time and labor management solution met each of BMW's specifications and more. With B-COMM, BMW saved time, money and enjoyed more success more quickly with its SAP systems.

«Anytime you make a change to a system, it's important to identify ancillary partners who can help make the process a success. Kaba Benzing America's B-COMM applications made the transition to SAP's time management module easier. Their equipment worked perfectly with our environment. B-COMM offered great functionality off-the-shelf and the Kaba Benzing America team was able to quickly create a custom application to support our unique needs. Integration went really well - we were live in just 60 days from our first meeting.»
